

ALL-NEW RENAULT ARKANA

July 2021

sporty, spacious & hybrid

The all-new Arkana sports SUV looks like no other car in its class with its flowing lines and sleek coupé design. Sporty, Arkana also retains its SUV roots with ample interior space and generous boot space. The R.S. line trim with the E-TECH Hybrid powertrain embodies the best of what Arkana has to offer.

sportiness embodied

Sportiness is found in every details. The R.S. Line version draws inspiration from the world of motorsport and combines robustness and elegance with sporty elements such as the F1® style front splitter, the 18" Silverstone alloy wheels and the twin-exhaust pipe complementing the assertive SUV look. The premium cabin of Arkana R.S. Line also exudes sportiness with a mixed leather-suede upholstery with red over-stitching. Behind the perforated leather steering wheel sits a carbon-look dashboard punctuated with a red stripe, with the seatbelts enhanced by the same red stitching as the seats.

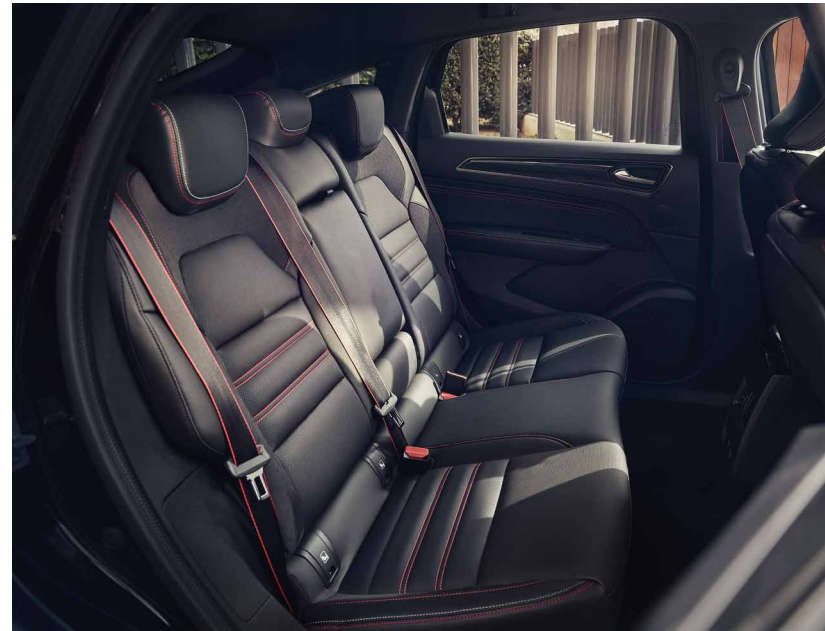

Visual shown with 10" digital driver cluster not available at launch.

plenty of space

The all-new Arkana reinvents the class as a coupé with the space of a saloon. The 513 litre (480 litre on E-TECH hybrid) boot offers generous capacity and is easy to access with its large hatch door. Inside, there's plenty of space for everyone. At the rear, passengers can enjoy plenty of headroom despite the sloping roofline of Arkana thanks to a clever orientation of the back seats designed to maximise space and comfort.

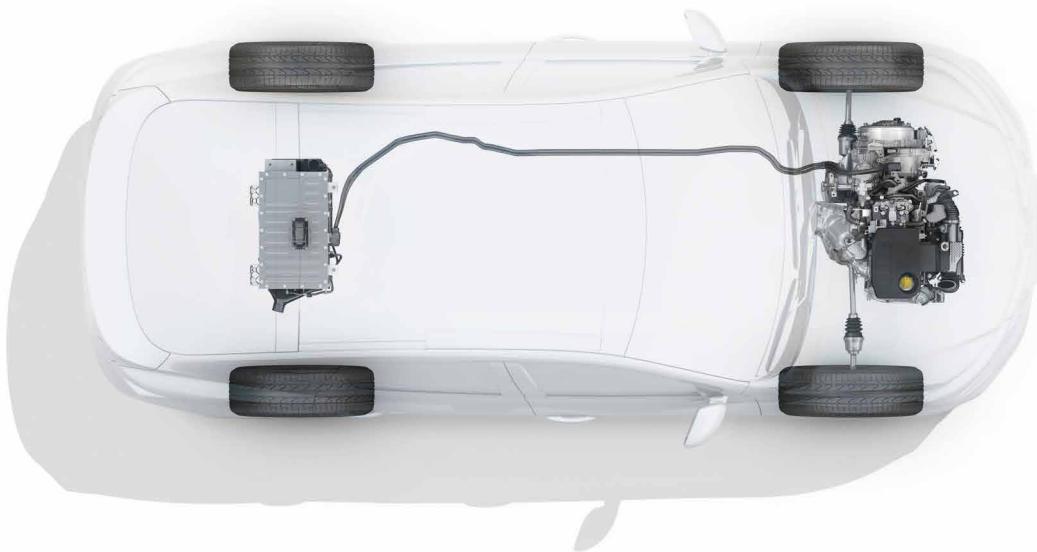

loaded with technology

The characteristic C-shaped front and rear lights house 100% LED lights, while inside sits a 7-inch horizontal or a 9.3-inch vertical touchscreen. The interior features several storage spaces, a wireless smartphone charger* and a brand new 9-speaker Bose sound system**. The multi sense system offers the driver a selection between 4 driving modes as well as 8 ambient lighting colours for a personalised driving experience.

*Standard on R.S. Line. **Optional.

E-TECH hybrid powertrain, versatility and efficiency

The efficient E-TECH hybrid system combines two electric motors with a petrol engine. The electric motors work together with the petrol engine when you pull away, come to a standstill or when you need extra power in acceleration phases. The electric power is supplied by a small traction battery which recharges through regenerative braking and is located under the back seats. The result: the support of electric power reduces fuel consumption from the petrol engine and enhances your driving experience with improved responsiveness and silence when driving in full electric mode.

Colour palette

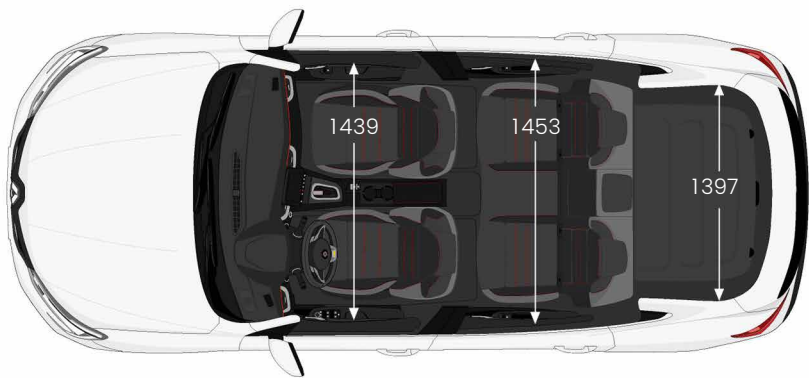

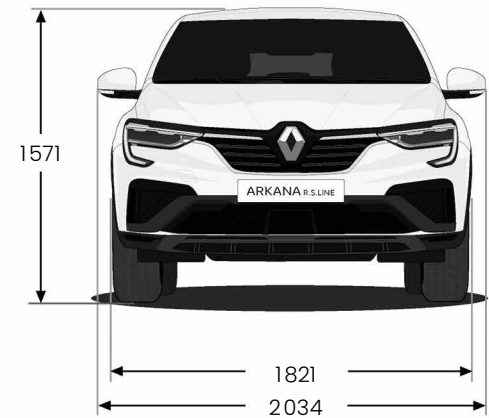

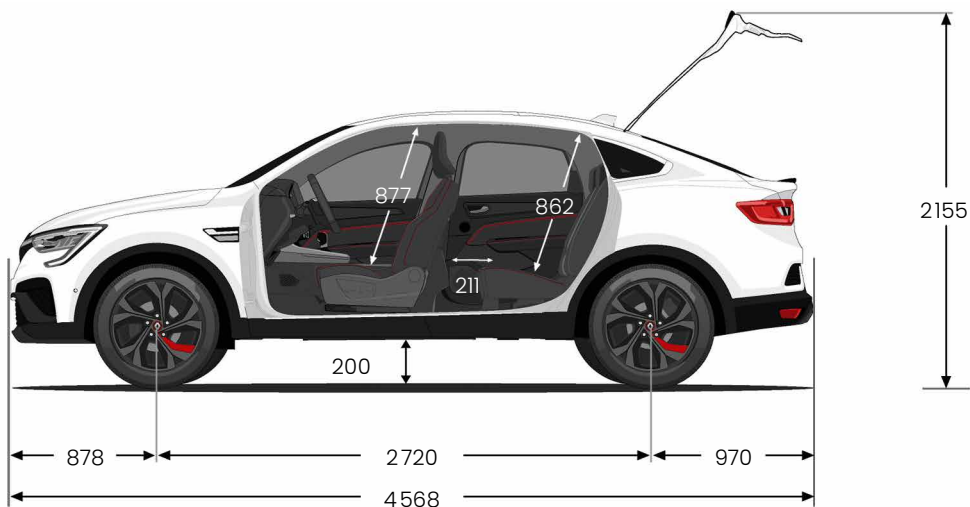

(1) Non-metallic paint.

(2) Metallic paint.

(3) Available on R.S. line version only

Every effort has been made to ensure that the information, descriptions, and images were correct at the time of publication however images may not always reflect the exact version selected. It should be noted that limitations on screen do not permit the subtle paintwork shades on this page to be shown with absolute accuracy.
