

ALL NEW
RENAULT
KANGOO AND KANGOO E-TECH
100% electric

revolutionary from the start... and recognised for it

The innovative and functional design of all new Kangoo has already gained global recognition, including winning International Van of the Year 2022.

24 leading journalists specialising in commercial, industrial, and transport vehicles placed Renault's latest van in front of the 14 light commercial vehicles from 11 different brands that have also been released in recent months.

WhatVan? has also named all new Kangoo as the best van in its sector this year, with a focus on safety and quality.

the essentials

** Retractable interior rack, available as an option.

1. easy inside rack*
2. 21.8 L overhead storage rack
3. 1.5 L dashboard storage with USB port
4. up to 4.2 m³ of loading volume and loading length of up to 3 m

easy loading

All new Renault Kangoo Van features equipment that is as essential as it is practical. In the loading area the easy inside rack* located on the ceiling makes transporting long objects easier while leaving the floorspace uncluttered. Thanks to a loading capacity of up to 4.2m³ together with its numerous clever storage areas, goods and equipment can easily be stowed away.

* retractable interior rack available as an option.

1. permanent rear view, smartphone holder and wireless smartphone mirroring
2. easy link multimedia system with 8" screen
3. wireless charger^

useful technologies

With the 8" easy link multimedia screen, you get connected navigation, with automatic updating of maps, traffic conditions and fuel prices. All new Renault Kangoo Van is also available with a wireless charger^: together with wireless mirroring, you can view your messages and make calls while recharging your smartphone. For even greater safety, you can see what's happening behind your new Renault Kangoo Van thanks to the permanent rear view*, a fully-fledged digital rear-view mirror.

*All equipment optional. ^Currently not available to order.

20 advanced driving assistance systems

All new Renault Kangoo Van comes with twenty optional advanced innovative driving assistance systems. Tried and trusted, it promises a safe and secure driving experience.

rear view assist. Via a digital screen – instead of the interior rear-view mirror – you can view what the camera installed at the rear of your vehicle sees.

rear-view camera. It provides a rearward view on the easy link screen or the interior rear-view mirror when you engage reverse gear. Superimposed outlines make your manoeuvres easier and safer.

hill start assist. Combined with ESC, hill start assist maintains brake pressure automatically for 2 seconds to give you time to lift your foot from the brake pedal and press the accelerator. The system activates when the slope exceeds 3%. Available as standard on all models.

wide view mirror. Located in the passenger sun visor, it improves your vision and helps to minimise the effect of blind spots at Y-junctions. Available as standard on Advance models.

Grip Xtend. It allows you to drive in all weathers on different types of terrain (mud, leaves, rough roads, etc.). The system combines electronic stability control (ESC) and all-weather tyres to bring you enhanced traction, available at speeds of up to 30mph.

"zoning" function For locking or unlocking either the front doors or the loading area.

*All equipment is optional

highway and traffic jam assist. Adjust your vehicle's speed and trajectory to the surrounding traffic. Active between 0 - 100 mph, this system regulates your speed, maintains a safe distance between you and the vehicle in front and helps you stay in your lane. When traffic slows down, the vehicle automatically stops and restarts for greater comfort and peace of mind.

active emergency braking system with vehicle detection. This system detects vehicles to the side or in front, and stops the vehicle in the event of any danger. Driving in the city has never been so safe, day or night.

blind spot warning. Active above 9 mph, this system uses warning lights to alert you to the presence of vehicles that are not visible in your field of vision.

lane keeping assist. Active between 40 and 100 mph, this system corrects the steering wheel to return the vehicle to its lane if you ever cross a continuous or broken line without activating your indicator.

adaptive cruise control. This system helps you maintain a safe distance between you and the vehicle in front of you while driving. The system operates the brakes when the distance is too short and the accelerator when the road is clear again.

road sign recognition and speeding alert. This system informs you of speed limits via the instrument panel and alerts you if you exceed the speed limit thanks to a camera positioned at the top of the windshield.

park assist systems. Driving has never been so easy. The front, rear and side parking sensors warn you with audible and visual signals when obstacles are close by. Hands-free parking performs all the manoeuvres for you. All you need to do is manage the speed.

sidewind assist. When there are strong cross winds or when a vehicle overtakes, it helps maintain your trajectory at above 40 mph.

trailer sway assist. Trailer sway assist helps you control your trajectory when towing a trailer. The system reduces its weaving without reducing speed, and improves road holding in difficult cross-winds or poor road conditions.

Sidewind and trailer sway assist as standard, other features shown are optional. Rear Park Assist is standard on Advance.

Tyres			
Tyre / wheel size		205/60 R16 / 16"	

(1) Fuel consumption and CO₂ emissions are certified using a standard, regulatory method. This method is identical for all manufacturers and enables vehicles to be compared. France data, excluding camber. (2) WLTP (Worldwide Harmonised Light Vehicle Test Procedures): this new protocol provides results much closer to those found in daily use compared to the NEDC protocol.
